SUBJECT: ACCEPTANCE OF AMENDMENT TO THE 2005 REPORT OF DISPOSAL SITE INFORMATION FOR L AND D LANDFILL, 8635 FRUITRIDGE ROAD, SACRAMENTO, CA 95826, SWIS #34-AA-0020

Background On September 8, 2008, Local Enforcement Agency (LEA) staff received an application package to amend the 2005 Report of Disposal Site Information (RDSI) for L and D Landfill. The application requested to amend the RDSI in regard to the following change:

- Add equipment and personnel for automation of C&D Recycling
- Enlarge asphalt pad
- Expand access roads

LEA Actions As the LEA, the Environmental Management Department is responsible for ensuring that the amendment complies with Title 27 requirements:

- The proposed change must be consistent with all applicable certified and/or adopted California Environmental Quality Act (CEQA) documents, or it must be determined by the LEA that the change would not create any adverse environmental impacts and is exempt from the requirements of CEQA.
- The proposed change must be acceptable and consistent with, but not limited to, state minimum standards, and including financial assurances and operating liability criteria.
- The changes must not conflict with the terms and conditions in the current Solid Waste Facilities Permit (SWFP).

This determination will be made within 30 days of receipt of the amendment application Package pursuant to Title 27 of the California Code of Regulations (CCR) 21665.

Continued on next page

**LEA
Review/Findings**

LEA staff has reviewed the application package, the proposed amendment to the RDSI, the existing permit for the facility, and the existing RDSI. The LEA has made the following findings:

- The proposed amendment is consistent with CEQA.
- A review of the LEA inspections on file indicates that no violations of state minimum standards are expected with the changes proposed.
- The proposed change does not conflict with the terms and conditions in the current SWFP.

**LEA
Determination**

LEA staff has therefore accepted the amendment to the RDSI to allow the changes of adding equipment and personnel for automation of C&D recycling, enlarging the asphalt pad and expanding the access roads.
